MBA PRODUCTION AND OPERATION MANAGEMENT

COURSE OVERVIEW

The MBA in Production and Operation Management teaches you advanced strategies to improve the translation of product and service requirements into facilities, procedures, and operating organizations. This includes product design, production alternatives, facilities location and layout, resource requirements planning, quality control, and project management.

Our curriculum and hands-on approach contribute to effective and enhanced learning for all of our students. Studying production and operation management will broaden your career prospects with multinational businesses.

Upon completion of this course, students will be strongly positioned for leadership roles in operations management, operations effectiveness, purchasing, research and development, production, facilities and plant management.

Students will also be able to develop knowledge of the issues related to designing and managing manufacturing operations so that prosperity in today's job market is achieved.
